

Infor AutoRelease Cloud

Keep up with changing trading partner requirements

Infor AutoRelease® Cloud is a cost-effective, cloud-based alternative for automotive suppliers currently running older, on-premise versions of Infor AutoRelease. Built upon the latest IBM i technology, Infor AutoRelease Cloud allows automotive suppliers to easily stay in compliance with trading partner EDI mandates, avoid compliance-related fines, and overcome business development challenges—without having to monitor constantly changing business rules. By upgrading to Infor AutoRelease Cloud, automotive suppliers can eliminate capital expenses associated with on-premise upgrades, and benefit from near-seamless integration with existing ERP systems and an updated, modern user experience.

State-of-the art infrastructure with a lower TCO

Upgrading to Infor AutoRelease Cloud removes hardware costs from upgrades and frees IT resources from managing hardware and software infrastructure. A cloud-based infrastructure means that updates and new features and capabilities can be rolled out automatically. Additionally, the cloud-based infrastructure also offers greater redundancy and higher availability than is typically available with on-premise solutions.

Benefits

- Ensure compliance with EDI trading partners.
- Support EDI connectivity between Infor AutoRelease Cloud and your ERP system.
- Update to a more modern user experience.
- Eliminate hardware expenses from upgrade costs.
- Free IT resources from managing hardware and software infrastructure.
- Automatically implement software updates and new features and capabilities.
- Increase uptime.

Latest technology

- A single-tenant, software-as-a-service (SaaS) implementation offers high security, customization features, and scalability options.
- The latest IBM i technology and operating system, along with an automatic upgrade for bar code labels and forms, means that the underlying technology is always current.
- Implementation accelerators, available as fixed-priced, implementation services offerings, can help significantly speed up migration to the cloud.
- The web-based user interface (based on HTML5) doesn't require terminal emulators to interact with the application.

Meeting compliance requirements and growing business

- Trading partner EDI mandates are automatically updated, so they don't need to be manually added.
- Automatic trading partner requirements include demand normalization rules, shipping execution rules, and billing rules.
- An exhaustive trading partner catalog, which includes the most up-to-date rules and requirements across the automotive industry, provides a strong foundation for exchanging information building and growing new business relationships.

Flexible integration and use

- Infor AutoRelease Cloud seamlessly integrates with existing, on-premise, and IBM iSeries ERP solutions.
- The modern, intuitive web-based user experience makes Infor AutoRelease Cloud easy to use and learn.
